WEEK 10 DAY 5 COD ASSIGNMENT TASK OUTPUTS :

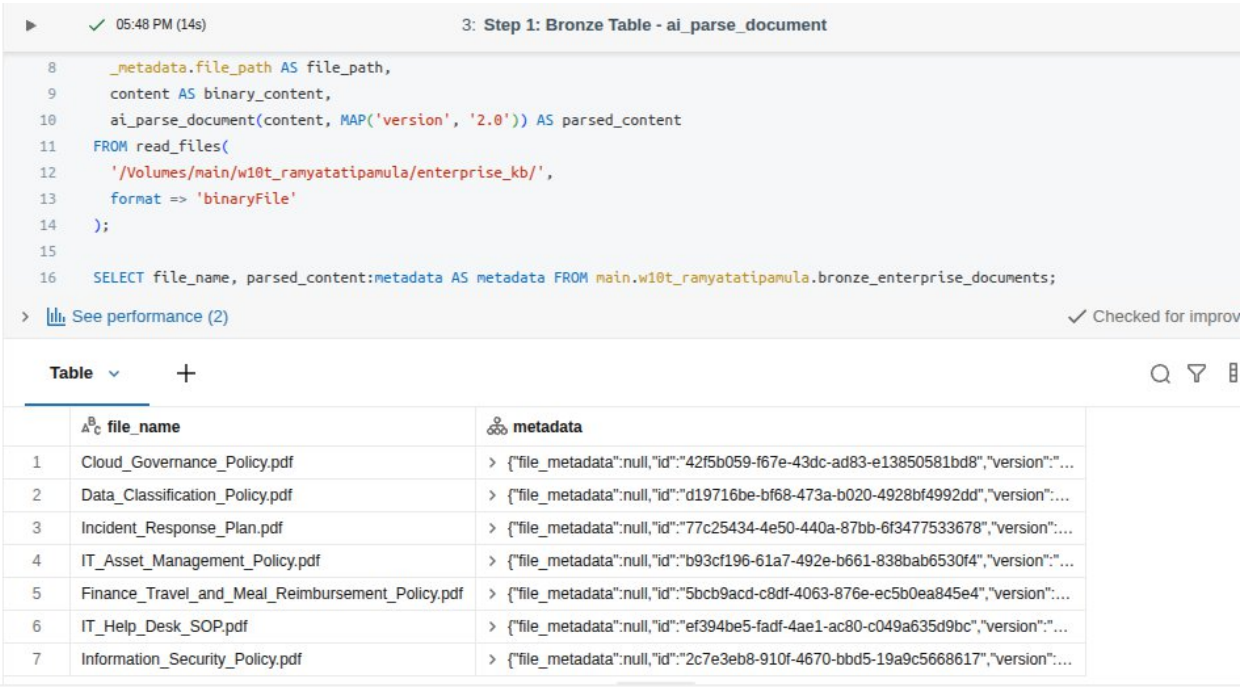

▶ ✓ 05:48 PM (1s) 2: Step 0: Schema & Volume Setup

```
4  spark.sql("CREATE SCHEMA IF NOT EXISTS main.w10t_ramyatatipamula")
5  spark.sql("CREATE VOLUME IF NOT EXISTS main.w10t_ramyatatipamula.enterprise_kb")
6  print("Schema and volume ready!")
7  print("\nFiles in volume:")
8  for f in dbutils.fs.ls("/Volumes/main/w10t_ramyatatipamula/enterprise_kb/"):
9      print(f"  {f.name}  ({f.size} bytes)")
```

› See performance (3)

```
Schema and volume ready!

Files in volume:
  Cloud_Governance_Policy.pdf  (2879 bytes)
  Data_Classification_Policy.pdf  (2865 bytes)
  Finance_Travel_and_Meal_Reimbursement_Policy.pdf  (2632 bytes)
  IT_Asset_Management_Policy.pdf  (2850 bytes)
  IT_Help_Desk_SOP.pdf  (2863 bytes)
  Incident_Response_Plan.pdf  (2892 bytes)
  Information_Security_Policy.pdf  (2815 bytes)
```

▶ ✓ 05:48 PM (14s) 3: Step 1: Bronze Table - ai_parse_document

```
8    _metadata.file_path AS file_path,
9    content AS binary_content,
10   ai_parse_document(content, MAP('version', '2.0')) AS parsed_content
11 FROM read_files(
12   '/Volumes/main/w10t_ramyatatipamula/enterprise_kb/',
13   format => 'binaryFile'
14 );
15
16 SELECT file_name, parsed_content:metadata AS metadata FROM main.w10t_ramyatatipamula.bronze_enterprise_documents;
```

› See performance (2) ✓ Checked for improv

What is the AWS access policy?

I need to find information about AWS access policy from the enterprise knowledge base, so I will query "AWS access policy" and retrieve relevant docs.

main.w10t_ramyatatipamula.enterprise_documents_index JSON

```
{
  "query": "AWS access policy"
}
```

AWS Access Policy (as documented in the enterprise knowledge base)

1. **Identity & Role-Based Access Control**
   - Access must be granted through approved company identity accounts.
   - Permissions are assigned via AWS IAM roles rather than individual users.
   - Use a least-privilege model: grant only the permissions needed for the specific role.
2. **Multi-Factor Authentication (MFA)**
   - All access requires MFA, especially for privileged operations.

What is the password complexity policy?

I need to find the password complexity policy from the enterprise knowledge base. I'll search the indexed documents for relevant policy.

main.w10t_ramyatatipamula.enterprise_documents_index JSON

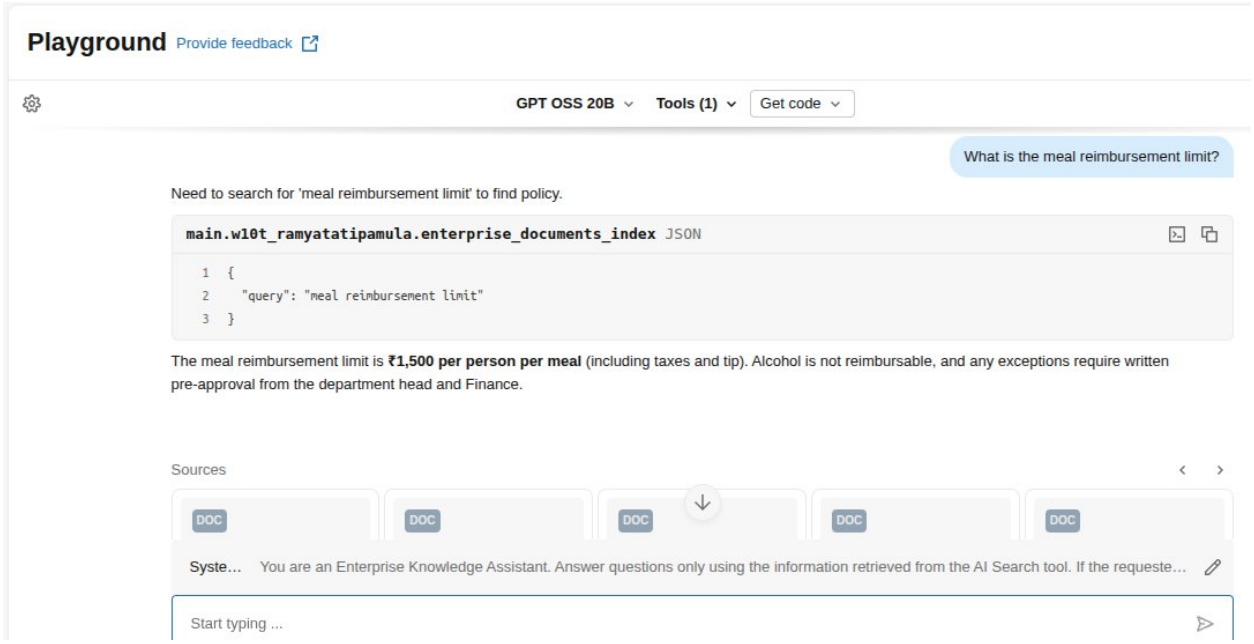

```
{
  "query": "password complexity policy"
}
```

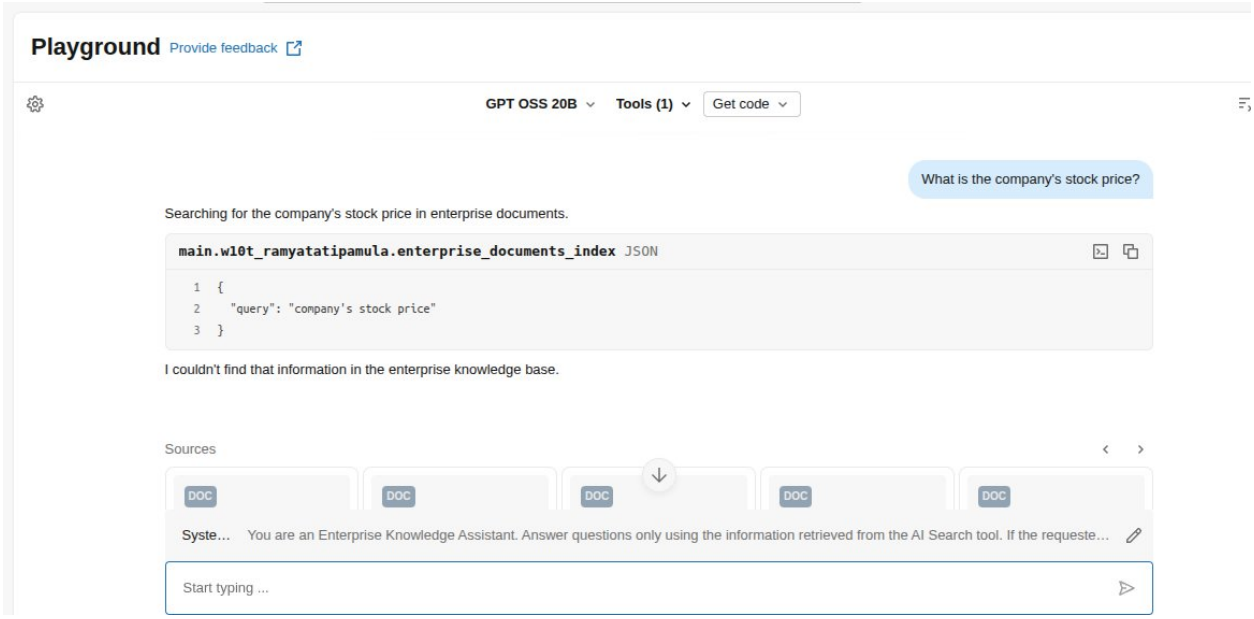

Password Complexity Policy

- Passwords must be **at least 14 characters long**.
- Each company account must use a **unique password**; personal passwords should not be reused.
- Where supported, passwords should include a mix of character types (uppercase, lowercase, numbers, symbols), but the primary emphasis is on length and uniqueness.
- **Multi-factor authentication (MFA)** is required for remote access and p…ged accounts.
- Passwords may never be shared or stored in plain text.
- All passwords should be stored in the company-approved password manager.

What is the meal reimbursement limit?
Need to search for 'meal reimbursement limit' to find policy.
main.w10t_ramyatatipamula.enterprise_documents_index JSON
1 {
2 "query": "meal reimbursement limit"
3 }
The meal reimbursement limit is ₹1,500 per person per meal (including taxes and tip). Alcohol is not reimbursable, and any exceptions require written pre-approval from the department head and Finance.
